THE

JOURNAL

OF THE

RUBBER RESEARCH INSTITUTE

OF

MALAYA

1951

Volume 13 Communications 271-6

Correct abbreviation for citing references, according to the World List of Scientific Periodicals:

J. Rubb. Res. Inst. Malaya

Errors in the pagination of this volume make it impossible to give references in the customary form, that is by volume number, year, and page number. For this reason the contents list opposite gives 'Communication' numbers (the serial number of the paper) in addition to the page numbers.

CONTENTS

	Communication	Page
Studies in Hevea Rubber		
I. Molecular state of the rubber hydrocarbon in freshly-tapped latex, *G.F. Bloomfield* ..	271	1
II. The gel-content of rubber in freshly-tapped latex, *G.F. Bloomfield* ..		18
III. Fractionation of fresh rubber and the interpretation of viscometric and osmotic data, *G.F. Bloomfield and G.W. Drake* ..	272	1
IV. Factors affecting the plasticity of raw rubber, and some new data on hardening of rubber by benzidine, *G.F. Bloomfield* ..		14
V. Oxygenated and low molecular fractions in fresh rubber, *G.F. Bloomfield*	273	1
VI. Characteristics of rubber in latex of untapped trees and in branches of trees in regular tapping, *G.F. Bloomfield*		10
A Provisional Classification of Malayan Soils, *G. Owen* ..	274	20
Progress of Breeding Investigations with *Hevea Brasiliensis*		
II. The crosses made in the years 1937-1941, *C.C.T. Sharp* ..	275	73
Proceedings of a Latex Symposium held at The Rubber Research Institute of Malaya, Kuala Lumpur on February 19th-21st, 1951	276	100
I. Abstracts of papers with discussion		114
II. Complete Papers		
Plant hormones and yield in *Hevea brasiliensis*, *G.W. Chapman* ..		167
Preliminary studies in the physiology of latex: experimental work by E.G.B. Gooding ..		177

	Communication	Page
A study of the Redox system of *Hevea brasiliensis* latex, *C. Cretin* ..	276	184
The injection of trace elements, especially of copper in the form of sulphate, into the *Hevea brasiliensis* tree, *P. Tixier* ..		192
A note on the phosphatase in latex, *S.L. Cheah* ..		200
A chemical stability test for latex, *J.H. Pidford* ..		206
Correlations of some constituents of latex and technical properties of the rubber, *P. Compagnon and C. Cretin* ..		211
